Office Action Summary

Application No.

09/848,885

Applicant(s)

EPSTEIN ET AL

Examiner

Minh Dinh

Art Unit

2132

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 February 2005.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-23 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-23 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 30 January 2002 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

Response to Amendment

1. This action is in response to the amendment filed 02/23/2005. Claims 1 and 20 have been amended. The abstract has also been amended.

Response to Arguments

2. Applicant's arguments filed 02/23/2005 have been fully considered but they are not persuasive. Applicant argues that Serret-Avila does not teach verifying the presence of a subset of data items in the dataset and randomly selecting such a subset (p. 10, 2nd paragraph). Serret-Avila discloses embedding a strong watermark in a subset of blocks designated as mark-holder candidates in a dataset using a key and verifying the presence of the blocks having the embedded strong watermark. Serret-Avila also discloses that subsets of mark-holder-candidate blocks are randomly selected for verification using random keys (figures 9A-B and corresponding text).

Applicant acknowledges that Serret-Avila teaches encoding a watermark in each data item of a dataset but argues that Serret-Avila does not teach verifying the presence of each of these items (p. 10, 3rd paragraph). The Serret-Avila watermark embedded in each data item is the signature of the preceding data item and each signature is verified to determine the presence of an authenticated data item (figures 10-11).

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies in the last paragraph of page 3 (i.e., there is no verification in Serret-Avila that the

Art Unit: 2132

number of data items submitted to the process of Fig. 11 corresponds to the number of watermarked data items in Fig. 10) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-7, 18 and 20-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Serret-Avila (6,785,815).

Regarding claim 1, Serret-Avila discloses a system that is configured to receive one or more select data items of a plurality of data items corresponding to a data set, comprising: a verifier that is configured to provide a verification of a presence of the data set (col. 11, lines 23-29; figure 15, element 1534), via: a first verification of a presence of a select subset of the plurality of data items (figures 9A-9B), and a second verification of a receipt of all of the plurality of data items (figures 10-11), and wherein

the verifier provides the verification of the presence of the data set if either the first verification or the second verification occurs (figure 11).

Regarding claim 2, Serret-Avila further discloses a renderer that is configured to receive the data items, and a gate, operably coupled to the renderer and the verifier, that is configured to selectively inhibit or allow access to an output of the renderer corresponding to the data item, based on the verification of the presence of the data set (figures 11 and 13).

Regarding claim 3, Serret-Avila further discloses that the renderer is further configured to store the one or more select data items in a secure format that inhibits a subsequent rendering of the data items, and the gate is further configured to allow the subsequent rendering of the data items from the secure format (figure 12B).

Regarding claim 4, Serret-Avila further discloses that the system is further configured to provide a recording of the one or more data items (figure 13).

Regarding claims 5-6, Serret-Avila further discloses that the verifier is configured to identify the select subset, based on a random process, and the first verification includes consideration of a likelihood of receiving or not the select subset of data items by chance occurrence (figure 9B, col. 17, lines 39-43).

Regarding claim 7, Serret-Avila further discloses that the second verification includes a likelihood of an inaccurate reception of the one or more data items (figures 5A-5B).

Regarding claim 18, Serret-Avila discloses a method of controlling a rendering of data items of a data set, comprising: receiving sections of the data set, conducting a

Art Unit: 2132

first test for a presence of an entirety of the data set based on a receipt of randomly selected sections of the data set (col. 11, lines 23-29; figures 9A-9B), conducting a second test for the presence of the entirety of the data set based on a receipt of a quantity of different sections of the data set (figures 10-11; col. 17, lines 39-43), and controlling the rendering of the data items in dependence upon a result of either the first or second test (figure 11).

Regarding claim 20, Serret-Avila further discloses that each section further includes a section identifier, and the section identifier is included in each section as one or more watermarks (col. 20, lines 47-63).

Regarding claim 21, Serret-Avila further discloses a fragile watermark that is configured such that a modification of the section causes damage to the fragile watermark, and a robust watermark that is configured such that a removal of the robust watermark causes damage to the associated section (col. 20, lines 47-63).

Regarding claim 22, Serret-Avila further discloses that the data items correspond to at least one of digitally encoded audio content, and digitally encoded video content (col. 11, lines 23-28).

Regarding claim 23, Serret-Avila further discloses conducting a test includes verifying a random selection of the different sections of the data set (col. 20, lines 26-39).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 8-17 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Serret-Avila as applied to claims 1 and 18 above, and further in view of Oshima et al (6,266,299).

Regarding claims 8-9, Serret-Avila further discloses that each data item of the plurality data items includes one or more sections, thereby forming a plurality of sections comprising the data set, each section of the plurality of sections including a section identifier corresponding to the section (figure 4A; col. 20, lines 47-63) and the first verification is based on one or more responses to requests for specific sections of the plurality of sections (figures 9A-9B).

Serret-Avila does not disclose utilizing a data set identifier corresponding to the data set. Oshima discloses utilizing a data set identifier as a watermark (col. 7, lines 1-7). It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the Serret-Avila system to utilize a data set identifier as a watermark, as taught by Oshima, so that the origin of illegal copies could be determined from the watermark. Accordingly, the data set identifier is included in each section.

Regarding claim 10, Serret-Avila further discloses a fragile watermark that is configured such that a modification of the section causes damage to the fragile watermark, and a robust watermark that is configured such that a removal of the robust watermark causes damage to the associated section (col. 20, lines 47-63).

Regarding claim 11, Serret-Avila further discloses that the data items correspond to at least one of digitally encoded audio content, and digitally encoded video content (col. 11, lines 23-28).

Regarding claims 12-15, Serret-Avila further discloses that each data item of the plurality data items includes one or more sections, thereby forming a plurality of sections comprising the data set, each section of the plurality of sections including a section identifier corresponding to the section (figure 4A; col. 20, lines 47-63) and the second verification is based on a number of different sections received, compared to a total number of sections comprising the data set (figures 10-11; col. 17, lines 34-43). Serret-Avila does not disclose utilizing a data set identifier corresponding to the data set for verification. Oshima discloses utilizing a data set identifier corresponding to a data set as a watermark for verification (col. 7, lines 1-7; col. 35, lines 40-63). It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the Serret-Avila system to utilize a data set identifier corresponding to the data set as a watermark for verification, as taught by Oshima, to prevent reproduction of digital signal stored on illegal disks. Accordingly, the data set identifier is included in each section.

Regarding claim 16, Serret-Avila further discloses a fragile watermark that is configured such that a modification of the section causes damage to the fragile watermark, and a robust watermark that is configured such that a removal of the robust watermark causes damage to the associated section (col. 20, lines 47-63).

Regarding claim 17, Serret-Avila does not disclose via a verification of a correspondence among identifiers of the data set in each of the received data items. Oshima discloses a verification of a correspondence among identifiers of a data set in each of the received data items (col. 7, lines 1-7; col. 35, lines 40-63). It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the Serret-Avila system such that the verifier provides a verification of a correspondence among identifiers of the data set in each of the received data items, as taught by Oshima, to prevent reproduction of digital signal stored on illegal disks.

Regarding claim 19, Serret-Avila discloses conducting a test using a section identifier that is included in each section of the data set. Serret-Avila does not disclose conducting a test to verify a data set identifier that is included in each section of the data set. Oshima discloses conducting a test to verify a data set identifier included in data items of a data set (col. 7, lines 1-7; col. 35, lines 40-63). It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the Serret-Avila system to conduct a test to verify a data set identifier of the data set, as taught by Oshima, to prevent reproduction of digital signal stored on illegal disks. Accordingly, the data set identifier is included in each section.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Minh Dinh whose telephone number is 571-272-3802. The examiner can normally be reached on Mon-Fri: 10:00am-6:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gilberto Barron can be reached on 571-272-3799. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
